Horoscope Charts

Lagna Chart(Birth Chart)

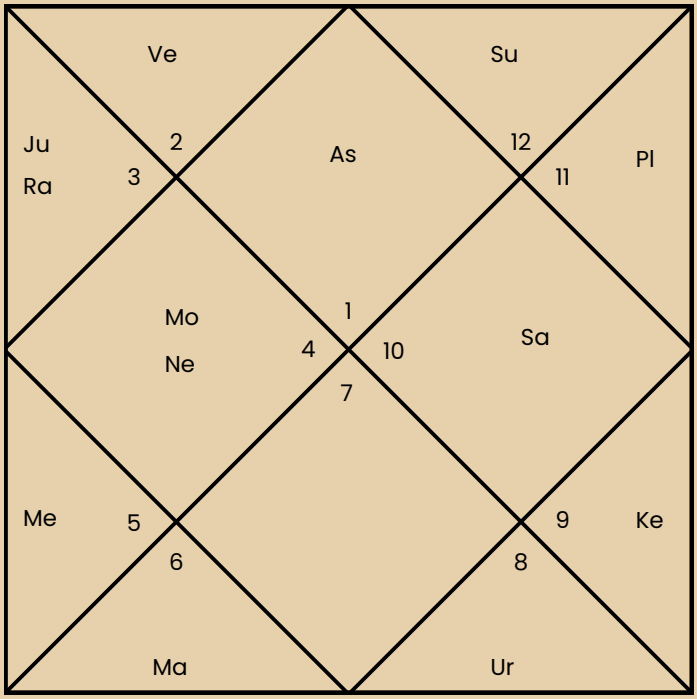

The Ascendant, also known as the Lagna, signifies the degree of the zodiac sign that is ascending above the eastern horizon during an individual's birth. This pivotal point holds immense significance within the natal or Lagna chart. Essentially, it establishes the initial house of the horoscope, subsequently shaping the arrangement of the remaining houses according to the sequence of the zodiac signs. As a result, the Lagna not only defines the rising sign but also serves as the foundation for delineating all the other houses present in the chart.

Moon Chart

The Moon Chart serves as a crucial predictive instrument, with planetary combinations carrying greater significance when they manifest in both the Moon and Lagna Charts.

Navmansha Chart(D9)

Among the various divisional charts, the Navmansha Chart holds paramount importance. "Navmansha" denotes the division of a specific zodiac sign into nine parts, with each division, known as an "Amsa," spanning 3 degrees and 20 minutes.

Sadhesati Analysis

What is Sadhesati dosha?

Sadhe Sati refers to the seven-and-a-half year period in which Saturn moves through three signs, the moon sign, one before the moon and the one after it. Sadhe Sati starts when Saturn (Shani) enters the 12th sign from the birth Moon sign and ends when Saturn leaves 2nd sign from the birth Moon sign. Since Saturn approximately takes around two and half years to transit a sign which is called Shani's dhaiya it takes around seven and half year to transit three signs and that is why it is known as Sadhe Sati. Generally Sade-Sati comes thrice in a horoscope in the life time - first in childhood, second in youth & third in old-age. First Sade-Sati has effect on education & parents. Second Sade-Sati has effect on profession, finance & family. The last one affects health more than anything else.

Kalsarpa Dosha

What is Kalsarpa dosha?

Rahu and Ketu are two nodes of Moon and they are regarded as fullfledged planets in Vedic Astrology. They are considered as most dreaded planets due to their heavy karmic effects.If all the 7 planets are situated between Rahu and Ketu then Kaal Sarp Yog is formed. **Most of the the Kalasarpa dosha effects are negative, while few can be positive too.Rahu or Ketu gives sudden positive changes which are huge and can happen overnight or within a span of few days.**

Manglik Analysis

What is manglik dosha?

In the horoscope of a boy or a girl, the presence of Mars, Sun, Saturn, Rahu, or Ketu in the first, fourth, seventh, eighth, or twelfth house is believed to create a condition known as "Manglik dosh."

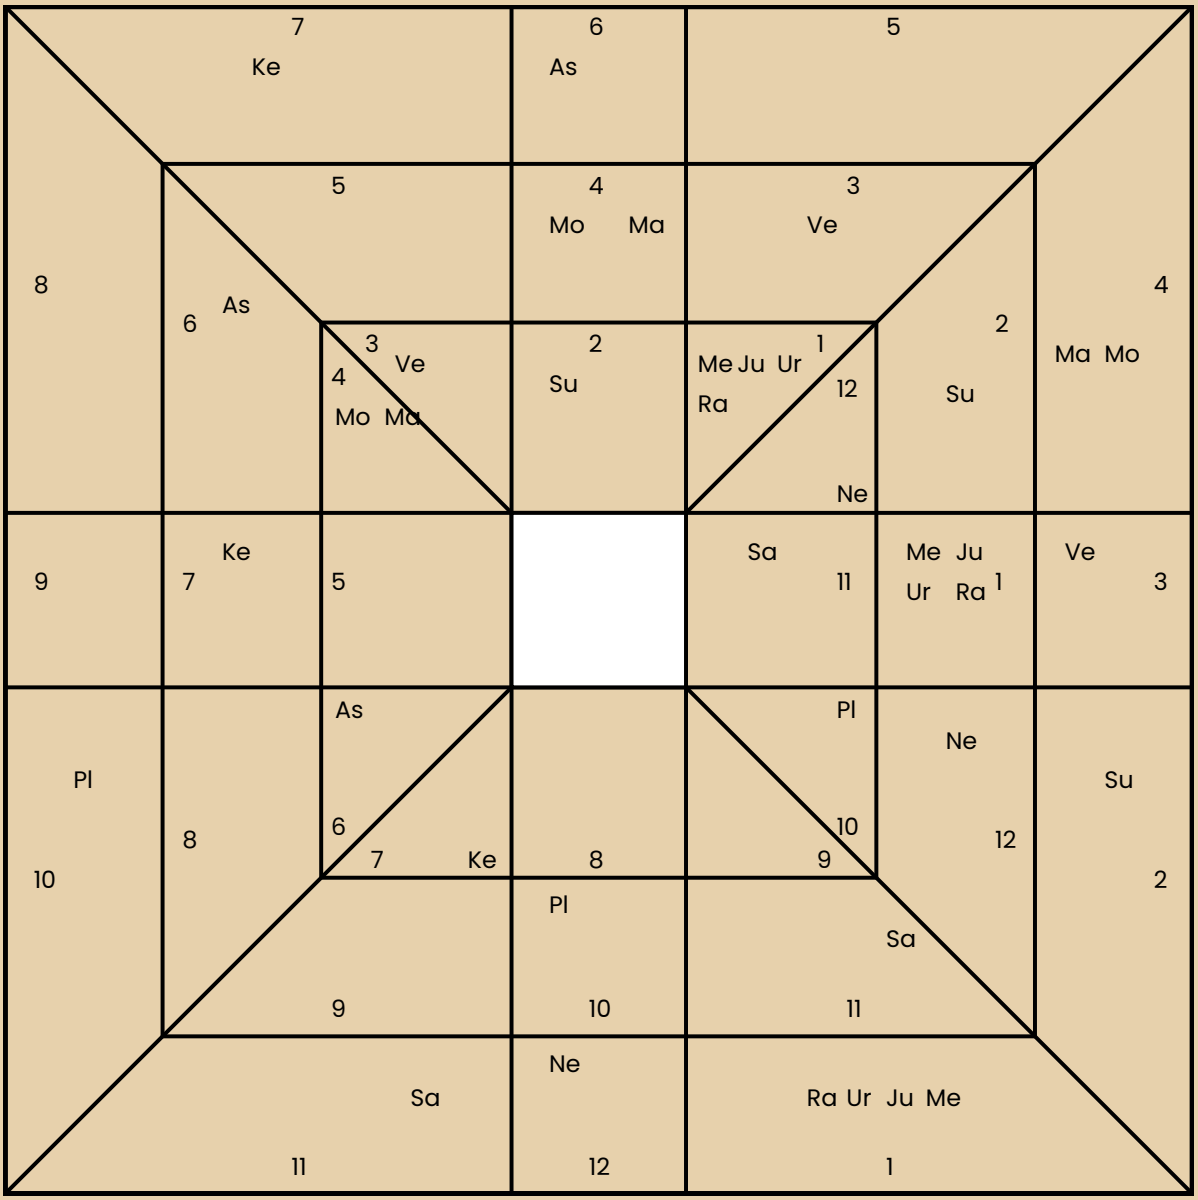

The strength of Manglik dosh is considered more significant when Mars is positioned in the ascendant, compared to when it is conjoined with the Moon in the ascendant. If, according to the Shastras (ancient texts), the Manglik dosh is nullified for both the boy and the girl, they are believed to be destined for a happy and harmonious married life.

However, if the Manglik dosh remains uncancelled, it is thought to lead to unnecessary problems and obstacles in their lives. Therefore, it is advisable for individuals to have their horoscopes thoroughly matched before embarking on married life. By properly nullifying the Manglik dosh, one can expect a life filled with peace and prosperity.

Upagraha

In astrology, Upagrahas, or sub-planets, are computed to correspond with each main planet. The calculation of sub-planets for the Moon, Venus, Mars, Rahu, and Ketu is determined based on the longitude of the Sun.

Dhumadi Group of Sub-Planets

Dhumadi Group of Sub-Planets involves the computation of sub-planets associated with the Sun, Mercury, Jupiter, Saturn, and an additional sub-planet of Mars. This calculation is rooted in dividing day or night into eight equal parts. The initial part is attributed to the lord of the day, followed by the remaining lords of the week in cyclic order. The eighth part is lordless. For nighttime births, the first seven of the eight equal parts are assigned to the lords of the planets starting from the 5th weekday.

There are two prevalent methods for determining the longitude. In the first approach, an ascendant is calculated for the commencement of the period governed by the planet. In the second method, the end of the period is considered. For Gulika, the sub-planet of Saturn, a third method exists to compute the longitude of the Dhumadi group of sub-planets, relying on fixed values of rise time. This calculated value, termed MAANDI in Astro-Vision Horoscope, is presented alongside the principal planets in the Rasi Chart.

Planet	Upagraha	Method of Calculation
Mars	Dhama	Longitude of Sun + 133 Deg. 20 Min.
Rahu	Vyatipata	360 - Dhuma
Moon	Parivesh	180 + Vyatipata
Venus	Indrachapa	360 - Parivesh
Ketu	Upaketu	Indrachapa + 16 Deg. 40 Min.

Gulikadi group

The Gulikadi Group of Sub-Planets is a significant aspect in astrology, particularly associated with the sub-planet Gulika, which is linked to the planet Saturn. This group plays a unique role in determining certain astrological aspects. The calculation of the Gulikadi group involves considering fixed values of rise time. These values are employed to find the longitude of the sub-planets within the group, contributing to the comprehensive understanding of an individual's astrological profile. The results, often presented as the MAANDI in an Astro-Vision Horoscope, are integrated into the Rasi Chart alongside the principal planets, providing a more nuanced and detailed perspective on the celestial influences at the time of an individual's birth.

In astrology, Gulika is believed to have its own distinct impact on an individual's life, influencing various aspects such as career, relationships, and overall well-being. Astrologers use the Gulikadi Group's calculations to provide insights into specific planetary positions and their potential influences. This adds a layer of depth to astrological analyses, allowing for a more comprehensive interpretation of an individual's birth chart and facilitating a more nuanced understanding of the celestial forces shaping their destiny.
